## PROFILE SUMMARY

**Senior Software & AI Systems Engineer** with 6+ years building and scaling enterprise AI platforms across US healthcare, financial services, and consulting. Proven expertise in designing cloud-native, distributed systems on AWS, delivering business-critical solutions including AI-driven claim denials management, credit risk assessment, enterprise AI assistants with model routing, and automated compliance reporting.

Demonstrated ability to own end-to-end solution delivery across data engineering, backend microservices, and agentic AI systems — spanning RAG and multi-agent workflows. Mentored 150+ engineers on LLM fine-tuning for hackathon. Driving measurable business impact through automation, intelligent decision support, and scalable architecture aligned with enterprise compliance and reliability standards.

## WORK EXPERIENCE

### Calfus

Bengaluru, IN

Senior Software Development Engineer – R&D/Applied AI

Feb 2026 – Present

- Built a patient/insurance denials management platform for US healthcare clients, designing a **Medical coding agent (ICD-10, CPT)**, a **Denial triage agent** that parses **ERA 835** remittance files to categorize denials, and an **Appeal draft agent**, automating the denial-to-appeal workflow end to end.
- Developed an internal enterprise ChatGPT with an **Intelligent model router** that scores query complexity to select the optimal LLM and dynamically decide **RAG** usage, minimizing inference cost while maximizing response quality.
- Building AI-assisted compliance reporting for a **hedge fund management platform**, generating reports that notify users of compliance issues across their portfolios; own the full stack with **Python, SageMaker, Redis, MongoDB, PostgreSQL, S3 (boto3), Keycloak** and a GitOps delivery pipeline using **Docker, ECR, ArgoCD (ApplicationSets), Kubernetes (EKS), Terraform, NGINX ingress, Route 53**.
- Conducted a company-wide hackathon on LLM fine-tuning, educating and mentoring **150+ engineers on LoRA/QLoRA with Unsloth** on SageMaker JupyterLab Studio.
- Delivered an intern onboarding platform that develops AI-efficient engineers through **task- and mission-based learning activities**.

### JP Morgan Chase

Hyderabad, IN

Senior Software Engineer – AI Systems

May 2022 – Jan 2026

- Developed a predictive risk analytics solution using **Python, SQL**, and supervised machine learning on **AWS (SageMaker, EC2, S3, RDS)**, forecasting vulnerability closure timelines to identify unmanaged findings early, improving monthly risk prioritization and remediation planning; led a team of three engineers across system design and model development.
- Architected and deployed an enterprise-grade **Retrieval-Augmented Generation (RAG)** AI assistant using **OpenAI** and **Anthropic Claude APIs, LangChain, LlamaIndex, and vector databases (FAISS / OpenSearch)**, integrated with internal documentation stores on **AWS (S3, OpenSearch)**, enabling secure, compliant, and consistent employee Q&A system.
- Built a credit risk early-warning system leveraging **Python, Pandas** and feature engineering pipelines with **MLflow**-based drift monitoring, delivering risk signals via REST APIs (FastAPI) and **AWS orchestration (Step Functions, Lambda)**.
- Created a tool for PPT generation, reducing manual reporting efforts by 80% and saving 2,000+ hours monthly, by leveraging AI agents with task decomposition and validation workflows to automatically generate ppts in custom templates and formats.

### ZS Associates

Pune, IN

Business Technology Analyst

Feb 2020 – May 2022

- Developed a Python-based, microservices-driven platform on **AWS (FastAPI, Kafka, PostgreSQL, Docker, Kubernetes)** for sales call planning, enabling real-time data processing, secure APIs, and high-availability incentive compensation calculations, using classical NLP techniques (spaCy, NLTK) for call note analysis, physician segmentation, and territory insights.

## SKILLS

**Languages:** Python, SQL, Bash

**Machine Learning & AI:** Supervised/unsupervised learning, feature engineering, model deployment, MLflow, SHAP

**LLMs, GenAI & AI Agents:** OpenAI & Anthropic Claude APIs, LangChain, LangGraph, CrewAI, RAG, fine-tuning (LoRA/QLoRA), prompt engineering, vector databases (FAISS, Pinecone, OpenSearch)

**Databases & Storage:** PostgreSQL, MySQL, MongoDB, Redis

**Backend & APIs:** FastAPI, REST, gRPC, microservices, Kafka, Pandas, PySpark

**Cloud & DevOps:** AWS (EC2, Lambda, EKS, S3, RDS, SageMaker, Bedrock), Docker, Kubernetes, Terraform, ArgoCD, GitHub Actions

**Domain & Compliance:** US Healthcare RCM, Pharma, Credit Risk & Hedge Funds, Cybersecurity GRC; HIPAA, Basel III, GDPR, SOX

## EDUCATION

**Bachelor of Engineering (B.E.)**

**Electrical and Electronics Engineering**

Birla Institute of Technology, Mesra • 2016-2020 • Ranchi, India • CGPA – 7.53

**Class XII (Higher Secondary)**

Chinmaya Vidyalaya, Bokaro Steel City • C.B.S.E.2014-2016 • Bokaro, India • Percentage – 94%

**Class X (Senior Secondary)**

Chinmaya Vidyalaya, Bokaro Steel City • C.B.S.E.2002-2014 • Bokaro, India • CGPA – 10

## CERTIFICATIONS AND AWARDS

**AWS Certified Cloud Practitioner**

**AWS Certified Developer – Associate**

**AWS Certified Security – Specialty**

**AWS Certified Machine Learning – Specialty**

**Qlik Sense Data Architect Certification-** February 2021

**Q4-2024 Individual key Contributor Award** – Cybersecurity and Tech Controls Line of Business, **JP Morgan Chase**
